The woman suffrage question secms one of those perplexing problems which like Banquo's ghost will not down at the bidding of the politicians. A bill remarkable in its roundabout way to arrive at the question has been offered in the Missouri Legislature we can safely refer him to the editor of proposing to permit the women to vote two years hence on the question whether they desire to vote or not. If they do then the generous lords of creation will take a vote to see whether the state shall grant them their desires or otherwise. Now comes the vote a proposition to submit to the people a constitutional amendment giving the ballot to the women. The Graphic knows no valid reason why any tax payer should not vote, or why mere sex should qualify or disqualify ted as follows: minister the laws.

THE Kahoka Gazette works itself into a fine frenzy over the fact that the Graphic a few weeks since published an extract from a Chicago paper, criticising severly Governor Crittenden for requiring his appointees for St. Louis to sign resignations in blank. At the time the article appeared the statement had not been denied by the governor, though he has since Ladder Company, therefore, we the ungiven an emphatic denial of the charge. dersigned agree to organize ourselves We advise the Gazette to direct its big guns at some of its own party or- chased by said city council of Edina. gans in St. Louis as they have not been slow to make and reiterate the same charge When democratic papers thus speak of their own officers, can a republican paper not in "the ring," be supposed to know better than they do the secret springs and intrigues that characterize democratic policy and management in Missouri?
